

## THE PAYMENTS BANK FOR THE NEW ECONOMY

**Cross-border payments can be complex, costly and slow.  
Sometimes they get lost or stuck as tracking them is tough.**

Every business needing to pay suppliers, staff or subsidiaries abroad, or accept customer payments, comes up against the cross-border payment problem.

It's a \$5.5 trillion-dollar-a-year headache. That's the estimated revenue from cross-border payments made in 2024, according to McKinsey.

Historically, most payment innovation has been domestic, for consumers or on the front end. That's left international B2B money movement on the back end largely unaddressed.

**Banking Circle solves  
this with a fully licensed,  
next-generation bank,  
powered by the latest  
cloud-based technology.**

We connect the world's payment systems, enabling our clients to move funds in real time, globally. And we process all major currencies, securely and compliantly, helping those with global business ambitions serve their customers locally.

**Headquartered in Luxembourg**, Banking Circle Group has branches in Denmark, Germany, Norway, Sweden and the UK, subsidiaries in Australia, Liechtenstein and Singapore and a 'sister' banking entity in the US, with more growth to come.

**NEXT GEN BANKING.  
POWERED BY THE LATEST TECHNOLOGY.**
